Duration	38 mins 14 secs

Question 1

Correct

Marked out of 1.00

Flag question

Question text

Two strings **A** and **B** comprising of lower case English letters are compatible if they are equal or can be made equal by following this step any number of times:

Select a prefix from the string **A** (possibly empty), and increase the alphabetical value of all the characters in the prefix by the same valid amount. For example, if the string is **xyz** and we select the prefix **xy** then we can convert it to **yx** by increasing the alphabetical value by 1. But if we select the prefix **xyz** then we cannot increase the alphabetical value.

Your task is to determine if given strings **A** and **B** are compatible.

Input format

First line: String A

Next line: String **B**

Output format

For each test case, print **YES** if string **A** can be converted to string **B**, otherwise print **NO**.

```
Constraints
```

if(a==b) {

for(int i=a-1;i>=0;i--) {

while(str1[i]!=str2[i]) {

```
1 \leq len(A) \leq 1000000
1 \leq len(B) \leq 1000000
SAMPLE INPUT
abaca
cdbda
SAMPLE OUTPUT
YES
Explanation
The string abaca can be converted to bcbda in one move and to cdbda in the next move.
Answer:(penalty regime: 0 %)
#include<string.h>
int main() {
  char str1[1000000],str2[1000000];
  int flag=1;
  scanf("%s",str1);
  scanf("%s",str2);
  int a=strlen(str1);
  int b=strlen(str2);
```

```
for(int j=0;j<=i;j++) {
           if(str1[j]<'z')
           str1[j]++;
           else {
             flag=0;
             break;
           }
           if(flag==0)
           break;
        }
      }
    }
  }
  else
  flag=0;
  if(flag==0)
  printf("NO");
  else
  printf("YES");
}
```

Input	Expected	Got	
abaca	YES	YES	
cdbda			

Passed all tests!

Question 2

Correct

Marked out of 1.00

Flag question

Question text

Danny has a possible list of passwords of Manny's facebook account. All passwords length is odd. But Danny knows that Manny is a big fan of palindromes. So, his password and reverse of his password both should be in the list.

You have to print the length of Manny's password and it's middle character.

Note: The solution will be unique.

INPUT

The first line of input contains the integer N, the number of possible passwords.

Each of the following N lines contains a single word, its length being an odd number greater than 2 and lesser than **14**. All characters are lowercase letters of the English alphabet.

OUTPUT

The first and only line of output must contain the length of the correct password and its central letter.

CONSTRAINTS

 $1 \le N \le 100$

SAMPLE INPUT

4

abc

def

feg

SAMPLE OUTPUT

```
3 b
```

```
Answer:(penalty regime: 0 %)
#include<stdio.h>
#include<string.h>
int main() {
  int n,flag=0;
  char temp;
  scanf("%d",&n);
  char words[n][14];
  for(int i=0;i<n;i++)
  scanf("%s",words[i]);
  char reverse[14];
  for(int i=0;i<n-1;i++) {
    strcpy(reverse,words[i]);
    int size=strlen(reverse);
    for(int k=0;k<size/2;k++) {
      temp=reverse[k];
      reverse[k]=reverse[size-k-1];
      reverse[size-k-1]=temp;
    }
    for(int j=i+1;j<n;j++) {
      if(strcmp(reverse,words[j])==0) {
         flag=1;
         break;
      }
```

```
if(flag==1)
break;

int len=strlen(reverse);
printf("%d %c ",len,reverse[len/2]);

}
```

Input	Expected	Got
4	3 b	3 b
abc		
def		
feg		
cba		

Passed all tests!

Question 3

Correct

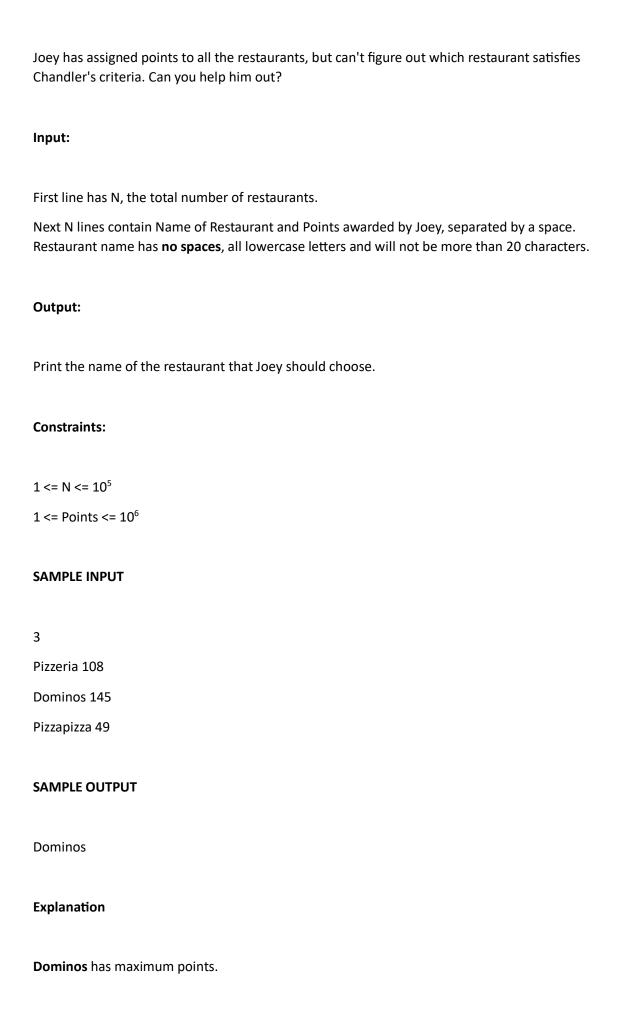

Marked out of 1.00

Flag question

Question text

Joey loves to eat Pizza. But he is worried as the quality of pizza made by most of the restaurants is deteriorating. The last few pizzas ordered by him did not taste good: (. Joey is feeling extremely hungry and wants to eat pizza. But he is confused about the restaurant from where he should order. As always he asks Chandler for help.

Chandler suggests that Joey should give each restaurant some points, and then choose the restaurant having **maximum points**. If more than one restaurant has same points, Joey can choose the one with **lexicographically smallest** name.

```
Answer:(penalty regime: 0 %)
```

```
#include<stdio.h>
#include<string.h>
int main() {
  int n;
  scanf("%d",&n);
  char res[n][21];
  int rate[n];
  for(int i=0;i<n;i++) {
    scanf("%s",res[i]);
    scanf("%d",&rate[i]);
  }
  int max=rate[0];
  char ans[20];
  strcpy(ans,res[0]);
  for(int i=1;i<n;i++) {
    if(rate[i]>max) {
       max=rate[i];
       strcpy(ans,res[i]);
    }
    else if(rate[i]==max) {
       if(strcmp(res[i],ans)<0)
      strcpy(ans,res[i]);
    }
  }
  printf("%s",ans);
}
```

Input	Expected	Got	
3	Dominos	Dominos	
Pizzeria 108			
Dominos 145			
Pizzapizza 49			

Passed all tests!

Question 4

Correct

Marked out of 1.00

Flag question

Question text

These days Bechan Chacha is depressed because his crush gave him list of mobile number some of them are valid and some of them are invalid. Bechan Chacha has special power that he can pick his crush number only if he has valid set of mobile numbers. Help him to determine the valid numbers.

You are given a string "S" and you have to determine whether it is Valid mobile number or not. Mobile number is valid only if it is of length 10, consists of numeric values and it shouldn't have prefix zeroes.

Input:

First line of input is T representing total number of test cases.

Next T line each representing "S" as described in in problem statement.

Output:

Print "YES" if it is valid mobile number else print "NO".

Note: Quotes are for clarity.

Constraints:

```
1 \le T \le 10^3
sum of string length <= 10<sup>5</sup>
SAMPLE INPUT
3
1234567890
0123456789
0123456.87
SAMPLE OUTPUT
YES
NO
NO
Answer:(penalty regime: 0 %)
#include<stdio.h>
#include<string.h>
int main() {
  int t;
  scanf("%d",&t);
  while(t--) {
    int flag=1;
    char s[100000];
    scanf("%s",s);
    int k=strlen(s);
    if(k==10) {
```

for(int i=0;i<10;i++) {

```
if(s[0]=='0') {
           flag=0;
           break;
         }
         if(s[i]<'0'||s[i]>'9') {
           flag=0;
           break;
        }
      }
    }
    else
    flag=0;
    if(flag==1)
    printf("YES\n");
    else
    printf("NO\n");
 }
}
```

Input	Expected	Got	
3	YES	YES	
1234567890	NO	NO	
0123456789	NO	NO	
0123456.87			

Passed all tests!
